

DIME TIME

BUSINESS PLAN

Get out of debt — build assets — one transaction at a time.

Tim Carlisle • Founder & CEO

dime-time.com • tim@dime-time.com

Executive Summary

COMPANY

Dime Time

INDUSTRY

Fintech — personal finance, micro-investing, debt reduction

PRODUCT

A mobile app that rounds up everyday transactions and automatically allocates spare change to debt repayment and Bitcoin (via Coinbase).

DIFFERENTIATOR

Dynamic allocation engine — users split round-ups between debt and crypto in real time (e.g., 80% / 20%).

CORE VALUE PROPOSITION

**“Get out of debt and
build assets automatically
— one transaction
at a time.”**

MODEL

Subscription SaaS · \$2.99 / \$3.99 / \$4.99 per month
Predictable recurring revenue, no transaction fees.

The Problem

CONSUMERS STRUGGLE WITH

- High-interest debt
- Lack of consistent savings habits
- Difficulty investing
- No automated system for financial progress

EXISTING SOLUTIONS FALL SHORT

- Require manual effort to maintain
- Focus on one outcome only — saving OR investing OR debt
- Lack behavioral automation

The Solution

Dime Time automates financial progress in three steps.

1

Round-Up Engine

Tracks every transaction via Plaid
Rounds purchases to nearest dollar

2

Allocation System

Splits funds dynamically between
debt repayment and Bitcoin

3

Automated Execution

ACH transfers via Mercury
Bitcoin purchases via Coinbase
Direct debt payments

No behavior change required — the engine works passively in the background.

Product Overview

CORE FEATURES

- Bank linking (Plaid)
- Real-time round-up tracking
- Allocation slider (0-100%)
- Debt account integration
- Crypto execution engine
- User dashboard with progress tracking

TECHNICAL STACK

FRONTEND	React + TypeScript
BACKEND	Node.js + Express
DATABASE	PostgreSQL (Drizzle ORM)
MOBILE	Capacitor (iOS + Android)

INTEGRATIONS

PLAID transactions + ACH	MERCURY funding account	COINBASE crypto purchases
------------------------------------	-----------------------------------	-------------------------------------

Market Opportunity

TARGET USERS

AGE 22 - 45 years old

INCOME \$40K - \$120K

PROFILE Has debt + interest in investing

POSITIONING

Sits between debt-reduction apps and micro-investing platforms.

MARKET DATA

\$17T+

U.S. consumer debt outstanding

60M+

Americans who own cryptocurrency

Fintech adoption

continues to grow rapidly across all generations.

Competitive Landscape

Quoins

FOCUS

Debt repayment

WEAKNESS

Filed Chapter 11
Limited scalability

ChangEd

FOCUS

Student loans

WEAKNESS

Narrow use case
No crypto, no investing

FOCUS

Debt round-ups

WEAKNESS

~8% transaction fees
Expensive at scale

Acorns

FOCUS

Investing

WEAKNESS

No debt integration
Only one outcome

DIME TIME ADVANTAGE

Dual allocation (debt + crypto) · Behavioral automation · Subscription model — not transaction fees

Revenue Model

BASIC

\$2.99

per month

Debt repayment automation

PRO

\$3.99

per month

Crypto automation

PREMIUM

\$4.99

per month

Debt + Crypto allocation

FUTURE REVENUE OPPORTUNITIES

- Refinancing products
- Lending services
- API licensing (allocation engine)

Go-to-Market Strategy

PHASE 1

Beta Launch

- TestFlight users
- Founder network
- Bug & flow validation

PHASE 2

Organic Growth

- TikTok / YouTube content
- LinkedIn launch
- Word-of-mouth

PHASE 3

Scale

- Influencer partnerships
- Fintech podcasts
- Paid acquisition

Traction — Current State

PRODUCT

iOS app live on TestFlight

Backend fully built and deployed

INTEGRATIONS

Plaid integration in progress

ACH approval pending

BUILD INVESTED

800+ development hours

Founder-led, 100% bootstrapped

BUILD VALUE

\$150K - \$300K estimated

Equivalent contracted build cost

System validated end-to-end with live financial integrations.

Financial Projections

Bottom-up model: \$3.50 blended ARPU · 12-month runway per cohort.

YEAR 1

USERS **5,000**

MONTHLY REVENUE **\$17.5K**

ANNUAL REVENUE
~\$210K

YEAR 2

USERS **25,000**

MONTHLY REVENUE **\$87.5K**

ANNUAL REVENUE
~\$1.0M

YEAR 3

USERS **100,000+**

MONTHLY REVENUE **\$350K+**

ANNUAL REVENUE
~\$4.0M+

Numbers assume modest CAC, organic growth-led, and current pricing.

Funding Strategy

CURRENT STATUS

100% bootstrapped to date

SEEKING

\$250K – \$500K

via SBA loan

with potential angel investment post-launch.

USE OF FUNDS

- Marketing & user acquisition
- Infrastructure scaling
- Legal (C-Corp + patent)
- Product development

Capital will fund user growth and scale transaction volume.

Roadmap

NEXT 30-60 DAYS

Launch

- Plaid ACH approval
- App Store launch
- Google Play launch
- Patent filing

NEXT 3-6 MONTHS

Scale

- User acquisition push
- Analytics + optimization
- Investor outreach
- Tier mix optimization

LONG TERM

Platform

- Financial automation platform
- Refinancing + lending stack
- International expansion
- API licensing

Vision

Dime Time becomes the default financial automation layer for everyday spending.
